Bajaj Allianz Life Group Superannuation Secure

Assure your employees a financially secured, stable and independent post retirement life.

Group Superannuation Secure is a non-linked, non-participating plan, variable fund-based Group Superannuation Scheme which can be taken by you (an employer) to manage pension fund for your employees. This scheme helps in building a substantial retirement fund, to ensure a secure regular income flow after retirement.

The plan offers a minimum Guaranteed Interest Rate, which will be guaranteed for the entire term of the policy and an Additional Interest Rate, which may be declared by the company at the start of each financial quarter.

How does the scheme work?

- The policy can be maintained as per your requirements under the following two options:
 - o Option 1 – Pooled-level or
 - o Option 2 – Member-level (individual account)
- From each contribution of yours as per the scheme rules premium allocation charge, applicable Goods and Service Tax, will be deducted and the balance will be credited to the individual/ pooled policy account
- The company offers a Guaranteed Interest Rate (GIR) of 1.5% compounding per annum as long as the policy is with us. An Additional Interest Rate (AIR) may be declared by the company at the start of each financial quarter for that quarter. The individual/ pooled policy account will be first credited with the GIR and then credited with the AIR declared, if any
- Any payment due to death, vesting or exits as per the scheme rules from the individual/ pooled policy account will get credited for GIR/AIR only for the period it remained invested in the policy account
- GIR and AIR credited to the Individual/ pooled policy account will only be to the extent and duration for which the fund remained invested.
- At the end of each financial year a return enhancer shall be provided such that the difference between the Gross Return and the net return will not be more than 90 bps
- Non-zero positive residual additions, if any, shall be credited to individual/ pooled policy account in order to meet the maximum reduction in yield at the end of each membership year starting from the fifth membership year as stipulated in Regulation 37 of IRDA (Linked Insurance Products) Regulations, 2013
- Balance in the total of all individual/pooled policy account is the accumulated value of your premium paid less premium allocation charge, applicable Goods and Service Tax on account of your members enhanced by GIR and AIR, if any, and non-zero positive residual addition, if any
- The investment pattern of the fund is governed by the IRDA regulation on the controlled fund

Benefits

Benefits under Option 1 – Pooled level

Events	How and when Benefits would be payable	Size of such Benefits/Policy monies
Death of a member	Payable immediately on death of the member, as allowed in the scheme rules	An amount as decided by you in accordance with the Scheme Rules
On Vesting (Retirement of a member)	Payable immediately on retirement of the member, as allowed in the scheme rules	An amount as decided by you in accordance with the Scheme Rules
On Exits (As per scheme rules)	Payable as allowed in the scheme rules	An amount as decided by you in accordance with scheme rules

On the pooled policy account at each point of time there is a assured guarantee of 101% of the contribution paid less amount paid on death, vesting or on any exits as per the scheme rules.

Benefits under Option 2 – Member level (individual account)

Events	How and when Benefits would be payable	Size of such Benefits/Policy monies
Death of a member	Payable immediately on death of the member, as allowed in the scheme rules	Individual policy account value or 101%* member's contributions, whichever is higher
On Vesting (Retirement of a member)	Payable immediately on retirement of the member, as allowed in the scheme rules	Individual policy account value or 101%* member's contributions, whichever is higher
On Exits (As per scheme rules)	Payable as allowed in the scheme rules	Individual policy account value

In case of bulk exit due to any event, the benefit payable will further be subject to the application of Market Value Adjustment.

Note - All the policy benefits are subject to policy being in-force

Bulk Exit

If the total amount, due to exits, as defined in the scheme rules, in the policy year including the current amount on exit, exceeds 25% of the balance in the total of all individual/pooled policy account at the beginning of that policy year, such an exit shall be termed as a bulk exit. Market Value Adjustment (MVA) shall be applied only to the amount which is over & above the amount representing bulk exit.

MVA losses (if any) shall be adjusted from your pooled/individual policy account. The value payable under such exits would be:

- **For Option 1 - Pooled Level:** An amount as requested by you, provided the grossed up amount after adjusting for the Market Value Adjustment (if any), does not exceed the balance in the pooled policy account. However, if such grossed up value exceeds the balance in the pooled policy account then balance in the pooled policy account less Market Value Adjustment (if any) shall be payable.

The grossed up amount means the amount as payable divided by (1-Market Value Adjustment factor).

- **For Option 2 - Member level:** Balance in the total of all individual policy account of exiting member(s) adjusted for the Market Value Adjustment (if any)

Market Value Adjustment

The market value adjustment is a factor to cover the market value losses of the underlying investment in relation to the balance in the total of all the individual/ pooled policy account.

For example, let's assume, that the book value of your individual/ pooled policy account at the beginning of the year is ₹ 1,00,00,000 while its market value is ₹ 90,00,000, i.e., at a 10% lower than the book value.

Suppose that, a request for an exit amount of ₹ 30,00,000 from you is received by us and that no earlier request for exits had been made by you during the policy year. In this case, the market value adjustment will be made only to the amount which is over & above the amount representing bulk exit, i.e., on ₹ 5,00,000 (₹ 30,00,000- 25%* 1,00,00,000). Hence, an amount equal to 30,00,000 + 55,555= 30,55,555 will be withdrawn post application of market value adjustment

Amount withdrawn	30,55,555
MVA	(55,555)
Amount received by you	30,00,000

Detailed calculation of MVA -

Particular	Details
Book Value(BV)of your pooled/ individual policy account at the beginning of the year	1,00,00,000
Market Value(MV) of pooled/ individual policy account	90,00,000
Market Value loss	10%
Amount Requested for exit	30,00,000
Amount representing bulk exit (MVA applicable on this amount)	$30,00,000 - 25\% \times 1,00,00,000 = 5,00,000$
Market Value Adjustment (MVA)	$\frac{\text{MV loss}\%}{(\text{MV} \div \text{BV})} \times 5,00,000 =$ $\frac{10\%}{(90,00,000 \div 1,00,00,000)} \times 5,00,000 = 55,555$
Fund post MVA loss adjustment	555,555
Amount withdrawn from pooled/individual policy account	$30,00,000 + 55,555 = 30,55,555$

Note - All figures are in rupees wherever relevant.

Surrender

You may do a complete surrender of your policy by giving an advance notice of three (3) months.

- Upon receipt of such request, the balance in pooled policy account/ total of all individual policy account less Market Value Adjustment (if any) shall be paid and the policy will terminate.
